WEIGHING DISHES (BOATS) - "diamond form"

- Manufactured from polystyrene for many applications such as weighing, dispensing and storing.
- Since the anti-static property of the raw material eliminates the static built-up, they are specially recommended for weighing fine powders.
- They can also be used as freeze and mixing trays for small batches and also during microwave moisture analysis.
- Guarantees excellent chemical and temperature resistance between -10°C to +70°C.
- Flat bottom ensures perfect stability on counters while smooth and non-porous inner surface provides accurate pour-outs with minimal sample loss.
- Available 2 products:
 - Non-sterilised
 - Gamma sterilised

With a slight pressure to the sides weighing dishes can easily be converted into a pouring funnel for easy and non-spill transfer of samples.
